Harvard University's CS50 Web Graduate
Zero To Mastery The Complete Web Developer in 2022 Graduate
Udacity Full-Stack Web Development Nanodegree Graduate
Treehouse Python Development Techdegree Graduate

EXPERIENCE

SOFTWARE ENGINEERING STUDENT\DEVELOPER   2020 - Present
Self-teaching, Online
- Developed a Full-Stack e-commerce app.
  - Utilized Django-rest-framework to create API endpoints.
  - Serialized data to JSON format for transportation between client and server.
  - Chose PostgreSQL database to store relational data, React.js to create fast responsive UI and Redux state management for scalability.
  - Used React hooks for more efficient and easier to maintain code.
    - MyBoxingShop
- Developed responsive webpages to match predefined designs using HTML/CSS & Vanilla JavaScript.
  - Social Media Dashboard | E-Commerce Product Page
- Designed & implemented relational database models, utilized Foreginkey constraints to reduce data duplication. Developed views, urls, templates, & static files for the Django app. Registered models for the admin UI, configured settings & deployed the app to Heroku.
  - Commerce(Auctions)
- Created a Django Email server. Utilized JavaScript to manipulate the DOM and fetch data from the backend API.
  - Email
