SUMMARY

Demonstrated achiever with a track record of self-teaching through multiple programming courses/certificates. Possess great communication skills combined with a fluency in several languages (English, Arabic, Mandarin, and Turkish). Fast learner, and strong problem solver. Engaged team player, with lots of positive energy. Always eager to grow and learn new technologies. Seeking opportunities to leverage my skills with a Software Engineering team to contribute towards common goals.

SKILLS

Python | Django | PostgreSQL | JavaScript | React JS | HTML | CSS | Flask | REST API | Git | GitHub | SASS | Bootstrap | AWS | Docker | Kubernetes | Unittest | Postman | Ubuntu

EXPERIENCE

CS50 Web Programming with Python & JavaScript Student - Harvard, Remote

Feb 2021 - PRESENT

- Created clones of Google Search, Google Images, and Google Advanced Search pages with HTML and SASS by utilizing the browser dev tools to copy the style of Google's aesthetics and behavior.
- Developed Wiki, a Python Django project inspired by Wikipedia, with functions to create, read, update, search for, and randomly select an entry, and developed Django templates to render the entries stored in a local folder in the project directory to the browser.
- Developed Auction, a Python Django project backed by a SQL database that stores relational data of users, listings, bids, comments, watchlists, and performs CRUD operations.
- Developed (mail) utilizing JavaScript to manipulate the DOM and fetch API to make asynchronous calls to the Python Django-based server.
- Deployed Flask, and Django-based web applications to Heroku.

Full-Stack Web Development Nanodegree Fellow - Udacity, Remote

Sep 2020 - Dec 2020

- Developed a PostgreSQL database for a Flask-based web app.
- Developed a PostgreSQL database-backed Flask-based web API.
- Secured and managed user authentication and access control using Auth0 for a Flask-based web API.
- Deployed a Flask-based web application to AWS using Docker and Kubernetes.

Python Development Techdegree Fellow - Teamtreehouse, Remote

July 2020 - Sep 2020

- Developed a Python-based console number guessing game.
- Developed a Python-based console Basketball Stats Tool.
- Developed a Python (OOP) based console Phrase Hunter game.
- Developed a Python-based console app that loads inventory data from a CSV file into an SQLite database and performs CRUD.
- Developed a Python Flask-based learning journal backed by an SQLite database with HTML and CSS.

Automotive Service Technician - Camelback Volkswagen, Phoenix, AZ

Jul 2019 - Dec 2019

Boxing\ MuayThai Coach - Freelance, Phoenix, AZ

Apr 2018 - Present

Automotive Service Technician - Campbell Volkswagen, Edmonds, WA

Jan 2017 - Dec 2017

Boxing\ MuayThai Coach - Title Boxing Club, Seattle, WA

Mar 2016 - Mar 2018

Pro Mixed Martial Arts\ Muay Thai Fighter\ Coach - Freelance, International

2010 - 2015

EDUCATION

Harvard - *CS50 Web Programming with Python and JavaScript*

Feb2021 - Present

Udacity - *Full-Stack Web Development Nanodegree*

Sep 2020 - Dec 2020

Team Treehouse - *Python Development Techdegree*

Jul 2020 - Sep 2020

Udemy - *The Complete 2020 Software Testing Bootcamp Certificate*

Jun 2020 - Jul 2020
